

**FINDING THE
RIGHT DONOR**
FOR EACH PATIENT

A close-up photograph of a woman with blonde hair smiling warmly while holding a newborn baby. The baby is sleeping peacefully, wrapped in a white cloth with a ruffled edge. The background is a soft, out-of-focus white.

**Fenomatch helps clinics to
find the right donor for
each patient, using a donor
management platform
with integrated AI**

Fenomatch is a donor management system for fertility clinics and donor banks that helps you get the results you need.

Our goal is to create secure technological systems that make the assisted reproduction process more efficient, as well as providing happiness and peace of mind for the families involved.

Filter donors by their facial resemblance to the patient

Use AI to compare over 12,000 biometric data points.

Check genetic compatibility

Check donor/patient compatibility with just one click.

Minimise the risk of human error

Automatically verifying traits such as ethnicity and gender, and providing traceability.

WHAT CAN YOUR CLINIC DO WITH FENOMATCH?

GET IN TOUCH WITH OUR PRODUCT OWNER
JOSH.RACKSTRAW@FENOMATCH.COM TO
FIND OUT MORE, OR TO ARRANGE A DEMO

Provide peace of mind to the patient

A certificate verifies the use of the latest technology in the donor selection process.

Save time and improve efficiency

Give your clinical team objective criteria to make the right decision.

Find the right donor

Work with your own gamete bank, or connect with others.
